IDT | INNOVATIVE DEFENSE TECHNOLOGIES

Summer Internships

Join a Team of Dedicated Engineers • Learn Leading-Edge Testing Technology

Gain Hands-On Programming Experience • Receive Individual Mentoring

Innovative Defense Technologies (IDT) is the industry leader in developing and delivering automated software testing solutions for large, mission-critical systems. The powerful suite of Automated Test and ReTest (ATRT) products facilitates the efficient integration, testing, and certification of complex software.

We believe that building and maintaining our cutting-edge products is possible only with a highly qualified team of experts. Over 90% of our employees possess engineering or computer science degrees. Many of our team members regularly speak and write as subject matter experts in their field. At IDT, we are intentional about creating a desirable corporate culture where our employees can thrive. We are committed to recruiting top talent. Part of that effort includes our summer internship program. Nine percent of our current employees are former interns.

"IDT's size meant I could do real work and have a measurable impact; my contributions were integrated into a product and will ship with the final version."
– Princeton University, Class of 2015

"The code I fixed or developed was included in deliveries to customers. I was on a really good team; the people I worked with were extremely friendly and helpful."
– Duke University, Class of 2015

Robust Internship Program

IDT's summer internships offer students the opportunity to learn from experts and perform meaningful work in a professional environment. Our interns tackle challenging problems and use leading-edge testing technology. Each intern is part of a team and is assigned a mentor. The program lasts for 10 to 12 weeks and the pay is competitive.

IDT is looking for individuals who can think outside the box and be instrumental in creating a new generation of technology.

Qualified candidates for intern positions should be enrolled in a B.S. or postgraduate degree in Computer Science, Computer Engineering or Electrical Engineering and have a strong academic record. All applicants must be U.S. citizens and be capable of obtaining a DoD security clearance.

"My intern experience at IDT was extremely positive in almost every way. The employees were an enormous help, especially my mentor."
– Virginia Tech, Class of 2016

"I enjoyed the work environment at IDT. Everyone is professional but also approachable. I felt that I was able to make a big difference in the Test Manager product."
– William and Mary, Class of 2015

"I got to see what a formal, established development process was like for the first time; going through code reviews helped me grow as an engineer."
– George Mason University, Class of 2016

IDT is an information technology business headquartered in Arlington, VA. Since 2006, IDT has been pioneering new ways of designing, developing and implementing best-in-class automated software testing solutions for the DoD, defense contractors and commercial customers. Using Automated Test and ReTest (ATRT) technology, IDT is changing the way software is being tested and analyzed. The company has a proven track record that includes the successful testing and analysis of many complex, mission-critical systems across a broad range of military commands. IDT has additional offices in Fall River, MA, Mt. Laurel, NJ and San Diego, CA.
